Endpoint Forensic

INSIDER Walkthrough

Q1 Which Linux distribution is being used on this machine?

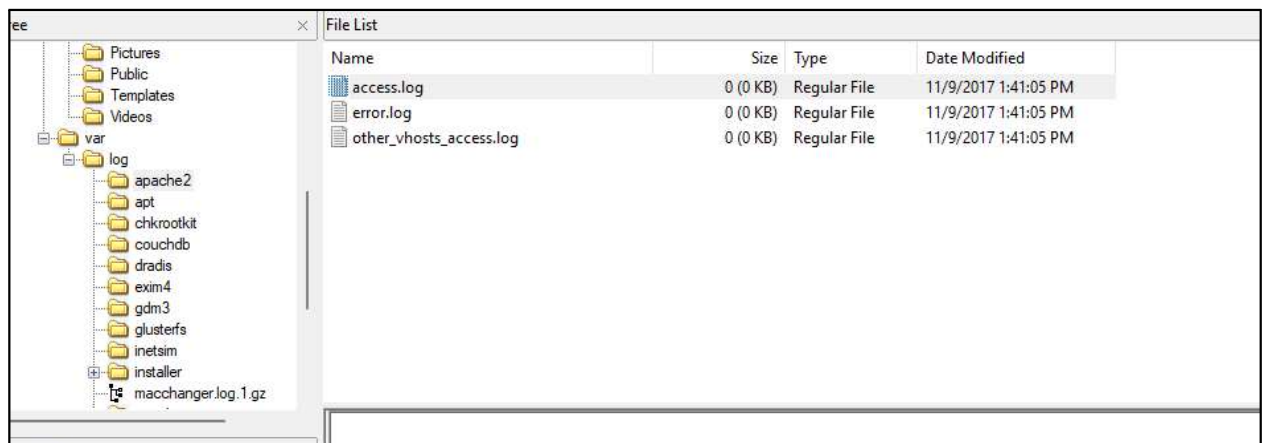

I go to boot/grub/grub.cfg and check menuentry

Q2

I go to var/log/apache2/access.log and see the file is empty

I right click the file then export file hash list

Then it becomes this csv file open and there is the hash

A2		X ✓ <i>fx</i>		d41d8cd98f00b204e9800998ecf8427e

```
Check List:  
- Gain Bob's Trust  
- Learn how to hack  
- Profit
```

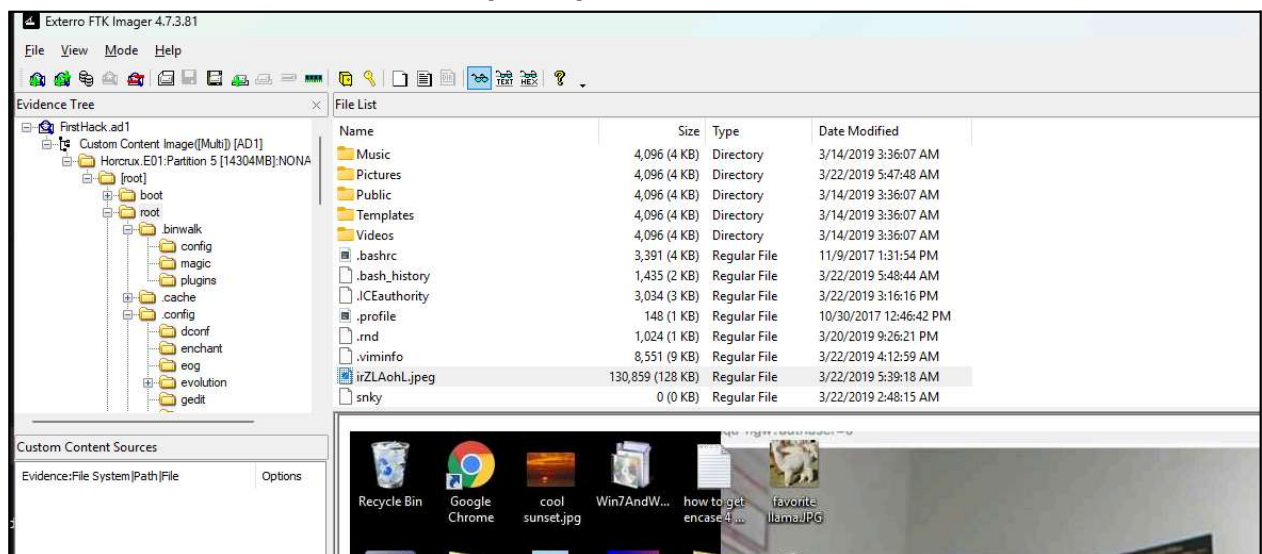

Q7

Go /var/log/apache2/error.log and see the error.log is empty meaning apache runs 0 times

Q8

Go /root scroll down there is an strange image name

Q9

Go to /root/Documents/myfirsthack/firstscript_fixed and the name is Young

The screenshot shows the Extremo FTK Imager 4.7.3.81 interface. The 'Evidence Tree' on the left shows a directory structure including 'Documents' and 'myfirsthack'. The 'File List' on the right shows a table of files in the 'myfirsthack' directory.

Name	Size	Type	Date Modified
bob.bt	0 (0 KB)	Regular File	3/22/2019 4:11:22 AM
didyouthinkwedmakeiteasy.jpg	1,865 (2 KB)	Regular File	3/22/2019 4:14:58 AM

hellworld.sh	20 (1 KB)	Regular File	3/22/2019 4:00:22 AM

The terminal window at the bottom shows the following commands and output:

```
echo "Showing you your current path"
pwd
echo "Show my default route"
ip route | grep --color default
echo "Show network connections w/ port 80"
netstat | grep --color 80
echo "Heck yeah! I can write bash too Young"
```

Q10

Go to var/log/auth.log and scroll where time show 11.26 and see successful su for postgres

The screenshot shows the Extremo FTK Imager 4.7.3.81 interface. The 'Evidence Tree' on the left shows a directory structure including 'var' and 'log'. The 'File List' on the right shows a table of files in the 'var/log' directory.

Mar 20 11:26:22 KarenHacker su[4074]: Successful su for postgres by root
```

Q11

Go through /root/.bash_history and go to the last cd command, that is the path

The screenshot displays a forensic analysis interface with three main panels:

- File Tree:** Shows a hierarchical view of the file system. The root directory is expanded, showing subdirectories like `boot`, `root`, `binwalk`, `config`, `magic`, `plugins`, `.cache`, `.config`, `dconf`, `enchant`, `eog`, `evolution`, and `gedit`.
- File List:** A table listing files and directories. The file `.bash_history` is highlighted.
- Terminal:** A command prompt window showing a series of `cd` commands.
